| | c. Identify and explain the different types of warehouse. | 10 | (3 :2 : 2) |

8. Case Study

GUCCI, the world's leading brand, has voluntarily launched its worldwide eco-friendly program to reduce the dependence on materials and use 100% recyclable paper in packaging. This 90-year-old company during its 90th anniversary in 2011 has taken this important action towards environmental responsibility. The shopping bag is 100% recyclable and Forest Stewardship Council (FSC) certified. FSC certificate verifies that all trees used to create paper bags and boxes come from well-managed forests. All stages in production process comply with FSC standards. In addition, GUCCI is also rationalizing its packaging to limit the excess. For example, shoes will be packed in one flannel instead of two. Gift boxes will only be given out when requested. All mannequins will be replaced by 100% recyclable material. GUCCI took a leadership position in industry by voluntarily initiating the process of certification for CRS (SA 8000)
